July 11, 2019

WORK EXPERIENCE

M.A Technology Inc.

Rosario Cavite, Philippines

Full-stack Web Application Developer

January 3, 2022 – Present

- I specialize in the creation of in-house web applications and dashboards, which are utilized by various departments to digitize their existing procedures. This not only reduces reliance on Excel for record-keeping and reporting but also facilitates a more seamless and efficient workflow for end-users.
- Key Responsibilities:
 - Engaged in cross-departmental collaboration with developers to successfully integrate desired functionalities and design into a user-centric web application.
 - Utilized HTML, CSS, JavaScript, JQuery, Next.js, React.js, Bootstrap, and Tailwind to construct the front-end of the website.
 - Leveraged PHP Laravel and Python Flask frameworks to create the backend and API of the web application.
 - Applied responsive design principles to ensure the web applications are optimized for viewing across a spectrum of devices, from desktop computers to mobile handhelds.
 - Enhanced the efficiency and user experience of web applications by optimizing performance to ensure rapid loading times.
- Achievements:
 - Ensured the successful deployment of all web applications in accordance with the established schedule.
 - Received recognition from both end-users and the company president for the web application's functionality, aesthetic appeal, and user-friendly interface.
 - Successfully systematize the purchasing department process from using papers and Excel to a fully functioning web application (e-commerce type) that boosts work efficiency and process speed and starts paperless transactions in less than 1 year, resulting in a successful external audit.
 - Systematize the old process of warehouse receiving of delivered materials from different international suppliers up to stocking in inventory, resulting in more accurate data and increasing material distribution in production.

GoCrayons Digital Inc.

Silang Cavite, Philippines

Website / Wordpress Developer

June 2021 – December 2021

- Managed the development and maintenance of WordPress websites, ensuring alignment with client specifications and the integration of aesthetic design with functional capabilities.
- Key Responsibilities:
 - Achieved client-specific customizations of WordPress themes and plugins by utilizing the WordPress Customizer, child themes, and direct code edits when necessary, ensuring a tailored user experience that aligns with brand identity.
 - Achieved optimal performance for web applications by implementing responsive design techniques, ensuring a seamless user experience across various devices and screen sizes.

- Ensured the continuous operation and reliability of WordPress websites by providing comprehensive maintenance services, including timely updates, security enhancements, and addressing client inquiries and requests.
