### Education

#### **Cavite State University**

Bachelor of Science In Computer Science

Rosario, Cavite

July 2019

### Experience

#### **MA Technology Inc.**

Full-stack Web Developer

Rosario Cavite, Philippines

January 2022 - June 2024

- Developed an e-commerce-type web application for the purchasing department to replace the old process of using Excel, transition to paperless transactions, and optimize the workflow, resulting in a 100% successful external audit in the purchasing department.
- Programmed a web app with a report-generating feature for the warehouse department and inventory to record and keep track of all the delivered materials from different suppliers.
- Built a web application dashboard with a maintenance scheduling feature for the facilities department to maximize the existing Android app they use to record all the readings in their machines and the power and water consumption of the company.
- Solved the issue regarding the slow fetching of data from the database backend to the client-side by presenting the server-side pagination using PHP Laravel.
- I designed and planned the structure of databases and tables using Microsoft SQL Server for all of my developed web applications.

#### **Go Crayons Digital Inc.**

Web Developer

Silang Cavite, Philippines

June 2021 - December 2021

- Programmed a Python script to be used by our SEO team that scans all the sitemaps of a WordPress website to detect any malicious URLs with a Japanese keyword hack.
- Built a WordPress e-commerce site with Woocommerce (an open-source e-commerce platform) for one of our international clients.
- I maintained all existing WordPress websites that are under our team to ensure security and performance, updated the plugins, and removed plugins that were not supported at all.
- Built a lot of WordPress websites and blog posts for different international clients and deployed them to different hosting services like GoDaddy and SiteGround.
